

METHOD AND APPARATUS FOR EDITING AN ELECTRONIC PROGRAM GUIDE

ABSTRACT

An electronic program guide can be configured by obtaining at a remote
5 controller for a content receiver, such as a set top box, a listing of the available programming
from a content provider and filtering the program material at the remote controller so as to
filter programming which has not been subscribed to by the user or parental access restricted
programming or programming which the user requests be omitted from the program guide.
Thus, according to this embodiment, a user can tailor the electronic program guide to the
10 user's preferences.
